# SIDE VENTED UNIT COVERS with Innerflow™ System

Side Vented Unit Covers with Innerflow™ System are engineered to give your outdoor unit complete weather protection.

## Features:

- Protects unit from top to bottom
- Removes damaging condensation
- Anti-cold crack material
- UV protected
- Fire retardant
- Mildew and fungus free
- 10 year Limited Warranty

## Why cover an Air Conditioning or Heat Pump Unit?

Throughout North America, a vast majority of people are covering their outdoor air conditioning units for a variety of reasons. Typically, air conditioners are covered during the fall, winter and early spring, to protect them from the elements and environment. Acid rain, harsh weather, ultraviolet rays, flying debris, ice, snow, blowing leaves, dust etc. must be protected against.

## Introducing The Innerflow™ System

The Innerflow™ System is molded from a highly durable PVC material, attached to our custom-made covers. This specially engineered section allows air to move freely throughout the covered air conditioning unit, yet prevents rain and snow from entering, keeping it dry and free of damaging condensation.

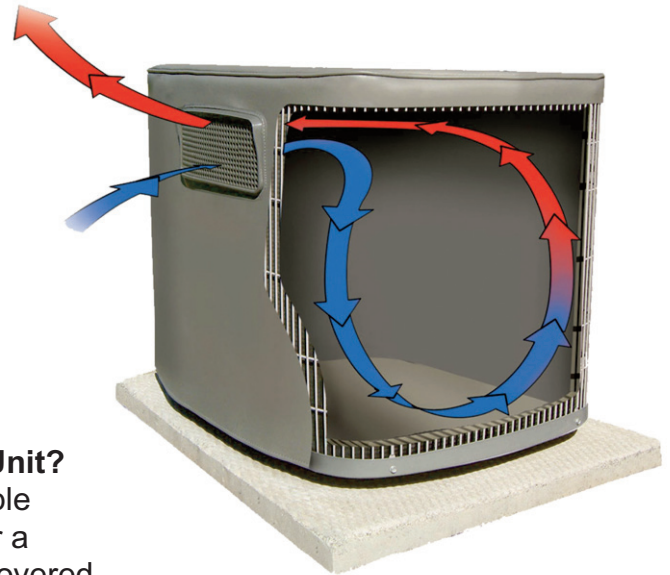

## How does it work?

In the fall, winter, and early spring, a sunny day can significantly raise the temperature inside a covered air conditioning unit, as the cover absorbs the sun's radiant heat.

This temperature variance between the interior of the covered unit and the outside ambient temperature generates a condensation build-up. Unlike conventional covers that trap this warm condensing air, the Innerflow™ System allows air to flow out of the covered unit, taking with it stale air and moisture. In addition, the Innerflow™ System effectively maintains a balance between the relative humidity inside and outside of the cover, thereby reducing, and even preventing, the formation of rust.

## Top Quality Vinyl

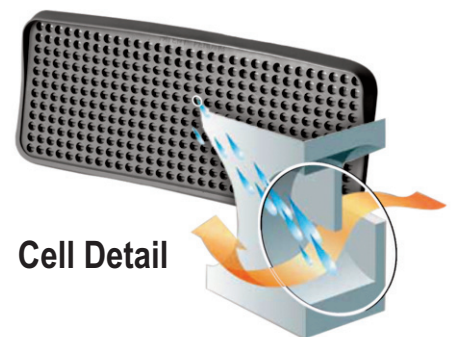

The Innerflow™ covers are made only from the highest quality materials, carrying with it strict standards. Superior features such as UV protection, anti-cold crack fire retardant, mildew and fungus free gives this cover complete weather protection.

# BOTTOM VENTED UNIT COVERS

## Totaline® Unit Covers

Totaline condensing unit covers are made of a heavy-duty vinyl with a durable cloth backing that resists ripping and tearing. This long lasting material is also specially treated to be mildew, UV and cold-crack resistant. Covers are available in a neutral gray or beige color and they're secured with a convenient hook-and-loop strap sewn around a precision cutout for the unit's electrical and refrigeration lines.

*Our bottom-vented air conditioner covers are ½" to 2 inches short to provide airflow from the bottom of the unit and the refrigeration opening. This design allows a minimum of 36 square inches of cross-ventilation.*

**All covers are ordered by specifications (W x D x H)**

### Features:

Keeps out dirt and debris during off-season. Reduces maintenance costs. Prolongs life of condensing unit.

- Premium 18 ounce industrial vinyl with a cloth backing. Gray or beige color to match cabinet.
- Precision tailored to fit the exact shape of cabinet (W x D x H).
- Material is specially treated against mold, mildew, fungus, UV and sub-zero temperatures.
- Precision opening to fit electrical and refrigeration lines with convenient hook-and-loop closure.
- Lifetime limited warranty.
